SUMMARY

Highly motivated Frontend Developer adept at crafting dynamic, responsive, and high-performance web applications. Possessing a strong foundation in modern web technologies, I excel at transforming complex designs into intuitive user interfaces. Uses AI tools to accelerate development while maintaining full ownership of code quality and implementation decisions. Committed to delivering clean, efficient code and exceptional user experiences through robust component-based architectures and seamless API integrations across various platforms.

SKILLS

- **Domain Skills:** Frontend Development, Web Development, User Experience (UX), Responsive Design, Accessibility, Cross-Browser Compatibility, Performance Optimization
- **Technical Skills:** React, TypeScript, Tailwind CSS, Redux, JavaScript, HTML5, CSS3, Flexbox, CSS Grid, DOM Manipulation, Git, GitHub, Git Workflows, AI-Assisted Development, Postman, Netlify, REST APIs, API Integration, Axios, Fetch, Database Integration, PostgreSQL, Shopify (Familiar With), Liquid (Familiar With)
- **Soft Skills:** Collaboration, Problem-solving, Attention to detail, Communication, Adaptability, Strong written English communication, Remote Collaboration, Async Workflow

WORK EXPERIENCE

Frontend Developer

October 2025 - February 2026

Freelance Project

Cairo, Egypt

- Led development of a scalable articles platform utilizing React, TypeScript, and Tailwind CSS.
- Integrated frontend with FastAPI backend and PostgreSQL, enabling dynamic content delivery and full-stack feature ownership.
- Implemented core features, including secure authentication, an admin dashboard, and image upload functionalities.
- Optimized component rendering and API data handling, significantly improving application performance and responsiveness.
- Deployed and maintained a production-ready application, ensuring continuous availability and optimal user experience.

Frontend Developer Intern

November 2025 - April 2026

Taha World

Cairo, Egypt

- Contributed to responsive web interface development using HTML, CSS, JavaScript, and React, ensuring cross-browser compatibility.
- Integrated REST APIs and managed data fetching with Axios/Fetch to support dynamic content and interactive features.
- Enhanced UI/UX and optimized application performance, leading to improved user satisfaction and engagement.
- Collaborated effectively within a development team using Git/GitHub, adhering to best coding practices and agile methodologies.

EDUCATION

Taiba Academy

Giza, Egypt

Bachelor of Computer Science

PROJECTS

Nexus Store (E-commerce)

Developed a scalable e-commerce application using React, TypeScript, and Redux Toolkit, emphasizing responsive design and pixel-perfect UI implementation. Integrated REST APIs for robust product management and authentication, utilizing reusable component architecture and Redux for efficient state management. Focused on performance optimization, problem-solving, and debugging to enhance user experience.

Dashboard UI 🔑

Designed and developed a responsive admin dashboard interface with React and Tailwind CSS, ensuring pixel-perfect UI implementation and cross-browser compatibility. Focused on creating modern layouts and a reusable component architecture. Emphasized performance optimization, problem-solving, and debugging throughout development for optimal maintainability and user experience.
